To whom it may concern:

The enclosed documents constitute a formal submittal and application for a Class II Permissive change to the Wi-Fi Module with FCC ID VSF22553 for limited use in host body worn configuration Allegro MX. When installed in this device, the module may also be collocated with a BT module with FCC ID VSF19799AR.

The application's supporting documentation covers measurements of radiated spurious emissions from the host system (with new Wi-Fi module installed into the host device) and an RF exposure evaluation using SAR measurements for the host device for body-worn use. Proximity to the head is not addressed as the host does not support voice-calls.

Cetecom Inc., as duly authorized agent prepared this submittal. If there are any questions or if further information is needed, please contact Cetecom Inc. for assistance.

Sincerely,

Satya Radhakrishna

EMC Project Engineer
